SUMMARY

To obtain an entry-level opportunity in Artificial Intelligence and Machine Learning where I can apply my knowledge of Generative AI, RAG, NLP, and Python-based development to build practical AI solutions. I aim to work in an innovative AI/ML environment where I can contribute to real-world projects while continuously strengthening my technical expertise. I aspire to grow into a skilled AI Engineer by developing reliable, scalable, and intelligent applications. I will achieve this through strong problem-solving, teamwork, dedication, and hands-on application of my skills in Python, machine learning, LLMs, FastAPI, and modern AI technologies.

EDUCATION

2023 – Present	Bachelor of Engineering, Artificial Intelligence & Machine Learning Bahubali College of Engineering, Shravanabelagola	CGPA: 8.07/10
2023	Class XII, Karnataka State Board	85%

PROJECTS

StoryVoiceAI — AI-Powered Storytelling & Audiobook Generator [GitHub](#)

- Built an offline-first storytelling app with a Next.js/TypeScript frontend and FastAPI backend, no external API calls.
- Fine-tuned a DistilRoBERTa model for emotion classification in dialogue, achieving 93% validation accuracy.
- Designed a hybrid offline TTS + procedural chiptune synthesis engine for distinct character voices.

SmartPDF AI — Local-First Document Summarizer & Study Assistant [GitHub](#)

- Built a privacy-focused study app generating summaries, quizzes, and flashcards from PDF/DOCX, fully on-device.
- Fine-tuned local bge-large-en-v1.5 embeddings for a custom RAG pipeline, achieving 95% retrieval accuracy on domain-specific queries.
- Shipped Next.js 15 + FastAPI with SSE streaming and citations auto-synced to a PDF.js viewer.

ACHIEVEMENTS

- Participated in **Teckathon**, BGMIT Mudhol.
- Participated in **Hackathon**, BCE Shravanabelagola.

SKILLS

Languages:	Python, TypeScript, JavaScript, Java, C++, SQL
GenAI / LLMs:	Prompt Engineering, RAG, Vector Databases (ChromaDB, FAISS), Embeddings, LLM APIs, Function Calling
AI / ML:	Scikit-learn, TensorFlow, Keras, Pandas, NumPy, OpenCV, Hugging Face, NLP, Speech Synthesis / TTS
Web & Backend:	Next.js, React, FastAPI, Flask, Node.js, REST APIs
Databases:	PostgreSQL, MySQL, SQLite, MongoDB
Tools:	Git, Docker, Docker Compose, Linux, VS Code
